

Overview

For my final project, I am going to build a website based on my side hobby of training for marathons. This is an extension of my Instagram account that I solely dedicate to running @xtianberunning. I will include the following as sections:

- My training current training plan for my next race in a table format.
- Mini galleries of my past races with links to the Spotify playlists I used at the time.
- A general photo gallery aggregated from my Instagram.
- Resources I normally use related to running.

Technical Notes

- Single-page scrolltop site (using jQuery)
- Attempt integration of Instagram and Spotify

Universal Header Nav

- Header remained fixed
- logo image will be default homepage link

Landing Page

- Large hero image.
- Logo button will slide this image into full view. (Using jQuery)

TRAINING PLAN

TRAINING
CALENDAR

DESCRIPTION

Functionality: Users are able to view my training calendar.

Implementation:

- Embedded Googlesheet

Gallery

Blowout of instagram image

Thumbnail
grid

DESCRIPTION

Functionality: Allow users to view a large gallery of images aggregated from my Instagram account

Implementation:

- Embed Instagram

Past Races as Told Through my Spotify Playlists

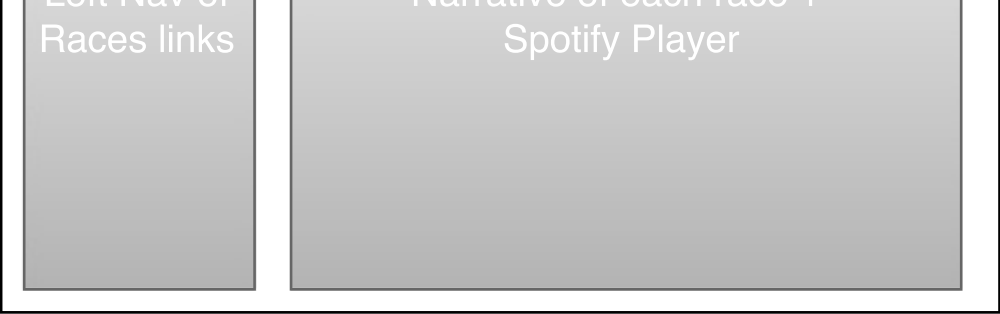

Left Nav of

Narrative of each race +

DESCRIPTION

Functionality: Allow users visualize and read about my experience in each of my races.

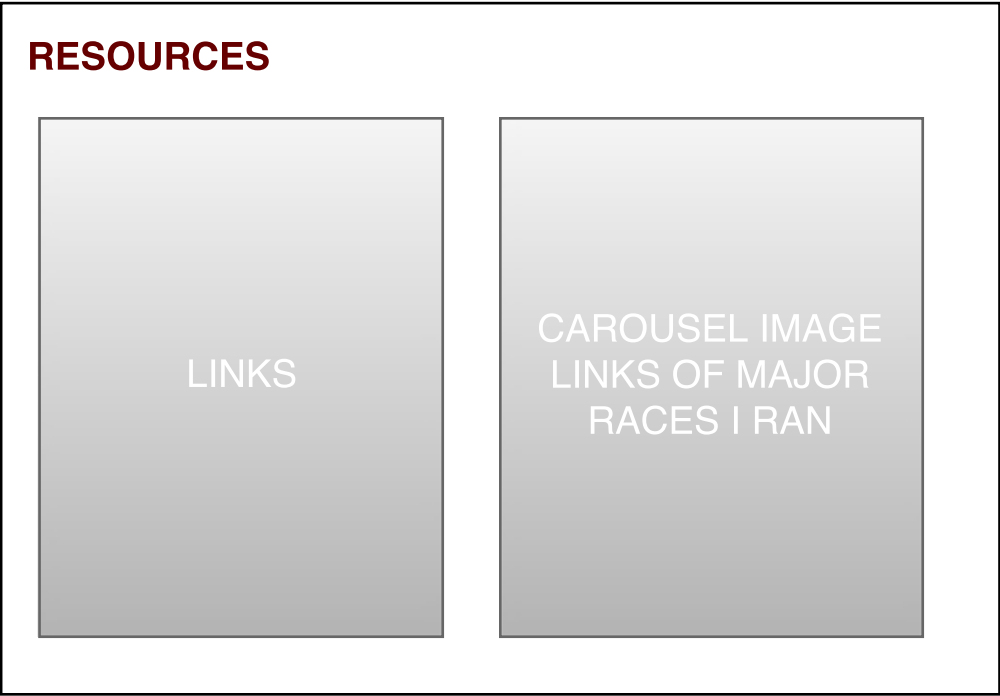

Design: Left nav buttons will slide a new narrative image from my race.

A song from a spotify playlist I used at the time will play.

Implementation:

- Embed Spotify

DESCRIPTION

Implementation:

- TBD. Possibly jQuery
